There are several prices for photovoltaic panels

Overview

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of €0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of €0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

How much did solar panels cost in October 2024?

Here's a detailed breakdown: High-Efficiency Solar Panels: The average price was €0.125/Wp, marking a 3.8% decrease compared to October 2024. Mainstream Solar Panels: Prices averaged €0.095/Wp, experiencing a 5% decline from October 2024. Low-Cost Solar Panels: Prices remained stable at €0.060/Wp, unchanged from the previous month.

How much does a solar module cost?

The price of solar modules has trended, broadly speaking, from \$240 per kW in 2020, to \$280 in 2021 and 2022 during the polysilicon shortage, then \$210 in 2023 as the shortage eased, and has fallen to around \$110 per kW this year. And for a brief moment, prices did fall to what we believe was, more or less.

Will solar module prices change in 2025?

As of January 2025, solar module prices have remained relatively stable

across all categories, including ultra-high-efficiency products and other module classes. While there have been minor price increases in the two lower categories—partially due to the updated classification—the overall market has yet to see significant price changes.

What's happening in the solar photovoltaic industry?

On-Demand Webinar This in-depth webinar explores the dynamic transformations occurring within the global solar photovoltaic (PV) industry. As geopolitical factors, trade policies, and manufacturing strategies evolve, the landscape of solar PV production and distribution is undergoing significant change.
