Uninterruptible Power Supply for Research Institutes in Nigeria

Overview

What is an industrial uninterruptible power supply system?

Industrial uninterruptible power supply systems (UPS Systems) include core technologies to cover industrial equipment. Our systems offer applications ranging from a few hundred watts to massive Multi-Mega Watt Parallel UPS installs inclusive of voltage regulations, voltage correction, sag correction, surge suppression and harmonic mitigation.

Why should you use uninterruptable power supplies?

Uninterruptable Power Supplies for 24/7/365 running of ATM's and SERVERS Protecting Critical equipment and control systems from surges and Voltage Fluctuation. When excellent customer service and experience is essential to your reputation, downtime is not an option.

What is a ups power supply & how does it work?

Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions. Uninterruptible Power Supply (UPS) ensures its internal battery gets constantly charged from the main electrical grid supply and delivers a steady, consistent electricity flow to any equipment or appliance plugged into it.
