Uninterruptible power supply time of CNG filling station

Overview

What is a CNG fuelling station standard?

This standard provides requirements for design, construction, testing, commissioning and guidelines on general operation and maintenance of Compressed Natural Gas (CNG) fuelling stations and facilities. It covers CNG fuelling stations, updating and replacing the obsolete standards IGE/UP/5 Parts 1 and 3.

What happens if ups fails in CNG sale?

Any failure in UPS supply leads to discontinuation in CNG sale. To increase the availability of the station, IGL has provided stand by UPS at stations, remotely located and having highest sale. IGL has covered 30% of identified sites, remaining will be taken care in FY 20-21. Also, IGL is changing battery on every 03 years to increase UPS back up.

How many CNG stations have been identified for reduction in sanction load?

41 CNG stations has been identified for reduction in sanction load as per past pattern of Maximum Demand Indicator (MDI) at CNG stations. Smart energy meters installed at 35 sites as a pilot project. Remaining shall be completed by FY 20-21. Any failure in UPS supply leads to discontinuation in CNG sale.

Can a CNG fuelling facility be integrated with other fuelling facilities?

2.8 The CNG fuelling facility may be integrated with new or existing fuelling facilities for other fuels, noting that by doing so this may impact the site licensing conditions. fuelling dispensers.

Is ISO 16923 applicable to domestic CNG fuelling devices without buffer storage?

ISO 16923:2016 is not applicable to domestic CNG fuelling devices without buffer storage. NOTE ISO 16923:2016 is based on the condition that the gas entering the fuelling station is odorized. For unodorized gas fuelling stations,

additional safety requirements are included in Clause 10.

Are mobile CNG storage units covered by this standard?

2.4 Mobile CNG storage units containing on-board ancillaries (to enable vehicle fuelling directly from the mobile unit (i.e. a CNG fuelling station)) are covered by the applicable parts of this Standard. 2.5 Fuelling stations dispensing LNG are not covered by the scope of this Standard.

Uninterruptible power supply time of CNG filling station

Optimized response to electricity time-of-use tariff of a ...

Jul 15, 2018 · The study applied cost benefit analysis to determine optimal location of new CNG fuelling stations among the existing petrol filling stations as well as existing CNG filling stations.
