

#### **SolarInvert Energy Solutions**

#### Victoria Environment Agency Communication Base Station Battery Energy Storage System

#### **Overview**

The project is the first of its kind in Australia — a standalone battery-based energy storage system being installed in front of the meter and directly connected to the transmission network — and the first grid-scale battery-based storage system commissioned in the state of Victoria. Does Victoria have a battery energy storage system?

Victoria fast-tracks battery storage project for a sustainable energy future: The Victorian Government is assisting a renewable energy developer fast track its Battery Energy Storage System —now approved through the Development Facilitation Program.

Will Victorian Government approve a battery energy storage system?

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of projects to support its renewable energy ambitions.

What is acenergy's battery energy storage system (BESS) project?

ACEnergy's Battery Energy Storage System (BESS) project in Little River has been fast-tracked through the Victorian Government's Development Facilitation Program, which streamlines planning approvals for major projects that deliver significant economic, social, and environmental benefits, including renewable energy facilities.

Which battery projects are being built in Australia?

The two projects are part of the Melbourne-headquartered company's growing portfolio that includes the 400 MW / 1, 600 MWh Gara and 250 MW / 1,000 MWh Yanco battery projects planned for New South Wales, and the 500 MW / 1,000 MWh Central battery energy storage system proposed for Queensland.

How many energy storage projects are there in western Victoria?

In March 2018, 2 projects in Western Victoria were chosen to be part of The

Energy Storage Initiative – one in Ballarat and one in Gannawarra. Construction for the Ballarat and Gannawarra Energy Storage Systems was completed in late 2018. Both batteries began operating over the summer of 2018 and 2019.

What is little river battery energy storage system?

design, bushfire risk mitigation, flood identification and mitigation, wetlands identification and watercourse set-backs. Little River Battery Energy Storage System (BESS) is located approximately 44 kilometres southwest of Melbourne. The project will support Victoria's clean energy transition and secure reliable, affordable power for Victorian's.

#### Victoria Environment Agency Communication Base Station Battery I

#### Telecom Battery Backup System , Sunwoda Energy

A telecom battery backup system is a comprehensive portfolio of energy storage batteries used as backup power for base stations to ensure a reliable and stable power supply.
