What is the new energy storage plant

Overview

What energy storage products does Tesla make?

Tesla's stationary energy storage products include the Powerwall, Powerpack, and Megapack. The second Tesla factory in China will mainly manufacture Megapacks for the domestic market and export. Tesla Megapack energy storage batteries. Credit: Tesla.

Will Tesla build more Megapack energy storage units?

With the new Megafactory, Tesla will be able to build more Megapack energy storage units for various utility and renewable energy projects locally and worldwide — like the 100MWh energy storage facility in Belgium that reportedly is the largest of its kind in Europe.

Where is Tesla building a Megapack battery plant in China?

The project is Tesla's second major facility in Shanghai, following the construction of its Gigafactory in 2019. Tesla China's main Megapack battery cell supplier is CATL, but the company has diversified its supply chain.

When will Xinhua Tesla's Megapack battery production start?

Credit: Xinhua Tesla has begun trial production at its new Shanghai megafactory, which is dedicated to manufacturing Megapack energy storage batteries. The mass production is expected to start in the first quarter of 2025 – less than a year since construction started.

When will Tesla's new megafactory start production?

The mass production is expected to start in the first quarter of 2025 – less than a year since construction started. The new megafactory is located near Tesla's existing vehicle gigafactory in the Lingang area and marks the company's first energy storage plant outside the US.

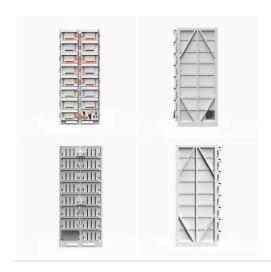

Is Tesla building a new 'megafactory' in Shanghai?

Tesla's building a new "Megafactory" in Shanghai, the automaker announced yesterday at a signing ceremony. The facility will be designed to manufacture Tesla's commercial Megapack battery energy storage units, with the goal of eventually producing about 10,000 systems per year, according to the automaker.
