Wholesale bess storage system in Puerto-Rico

Overview

How will a Bess system help Puerto Rico?

Iván Báez, vice president of corporate affairs at Genera PR, said “this is a fundamental step toward the modernization of Puerto Rico’s electrical system.” “Installing these BESS units will ensure greater stability and responsiveness of the network, helping us face both energy demand and unforeseen events in the system,” he said.

What is the Bess project?

The BESS project represents an essential solution for the stabilization and modernization of Puerto Rico’s energy system, with a storage capacity of 430 megawatts, equivalent to 1,720 megawatt-hours of energy for four hours, distributed in six strategic locations.

What is Ciro one's Bess Solar System?

Ciro One’s BESS will integrate a lithium-titanate oxide battery, which delivers higher cycling power and lower degradation than more commonly used lithium iron phosphate technology, says the company. The PV system, designed to withstand hurricane-force winds, will feature a lower panel tilt angle and east/west row orientation.
