Windhoek Coal Mine Large Energy Storage Project

Overview

Why is a battery storage facility important in Namibia?

The battery storage facility is expected to be crucial in improving system stability, lowering dependency on energy imports, easing the smooth integration of large-scale renewable energy sources into Namibia's power grid, and more effectively controlling demand peaks.

What is Namibia's first energy project funded by the World Bank?

The package places special emphasis on the integration of renewable energy through reinforced transmission lines and the installation of a second utility-scale battery storage facility. Under the leadership of NamPower, the national power provider, this historic endeavor represents the first energy project in Namibia to be funded by the World Bank.

How will NamPower change Namibia's energy environment?

With financing from the World Bank, NamPower's ambitious project is expected to drastically change Namibia's energy environment by lowering outages, promoting load growth, and creating new avenues for power trading within the Southern African Power Pool.

How can Namibia improve its electrical infrastructure?

A significant \$138.5 million investment package to improve Namibia's electrical infrastructure has been certified by the World Bank. The package places special emphasis on the integration of renewable energy through reinforced transmission lines and the installation of a second utility-scale battery storage facility.

Is Van Eck a coal-fired power station?

The Van Eck power station is the only coal-fired power station in Namibia. It is a sub-critical plant and initially had no emission controls. In 2014, it consumed approximately 570kg of coal per MWh of electricity generated. As

of 2021, it consumes approximately 650kg of coal per MWh of electricity generated.

How much coal does NamPower use per MWh?

As of 2021, it consumes approximately 650kg of coal per MWh of electricity generated. In 2017, NamPower rehabilitated the plant, reducing air emissions and extending the plant's life by an estimated ten years.
